emerging economies focus
Strengthening resilience and adaptive capacity to climate-related hazards and natural disasters in all countries.

Promoting mechanisms for raising capacity for effective climate change-related planning and management in least developed countries and small island developing States, including focusing on women, youth and local and marginalized communities.

Integrating climate change measures into national policies, strategies and planning.

Implementing the commitment undertaken by developed-country parties to the United Nations Framework Convention on Climate Change to a goal of mobilizing jointly $100 billion annually by 2020 from all sources to address the needs of developing countries in the context of meaningful mitigation actions and transparency on implementation and fully operationalize the Green Climate Fund through its capitalization as soon as possible.

Improving education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning.
Providing thought leadership on climate issues

Providing advisory services to constituents and/or partners

Organizing people to participate in climate issue action at the grassroots level

Engaging the public in better understanding these climate issues and/or take action on climate issues

Convening leaders to discuss and/or take action on behalf of climate issues

Creating and offering educational activities related to climate action

Conducting and sharing research on climate issues

Creating and/or supporting new standards of climate action and/or organizational structures working on behalf of climate issues

Advocating for public policy creation and/or change
